Toni Grundstom The JupiterImages / Photos.com / Getty Images The capacity to cut and paste is available on most computer-based devices. There are various ways to cut and glue to a Macintosh computer, Windows PC, iPad and mobile. This is a simple process once you know what the steps are. On an Apple computer you can use the keyboard to run many activities with shortcuts for commands, such as cutting and paste. To start, locate the "Apple" button on the left side of the space bar. Position the cursor at the beginning or end of the text, click with the left mouse button, keep it down, then move the mouse to highlight the text. Press and hold the "Apple" button and press "X" on the keyboard to cut the selected text. Paste the text by placing the cursor in which you want the text to be pressed and press the "Apple" button and press "V" on the keyboard. Highlight the text you want to cut by holding down the left mouse button and move the mouse on the text you want to cut. Place the cursor on the highlighted area and press the right mouse button. Select the "Cut" option. You can also use the "Edit" button and select "Cut". Paste the text by placing the cursor in which you want to insert it, press the right mouse button and select "Paste". An alternative way is to use the "Edit" button and select "Paste". Use the shortcut method highlighting the text and by pressing the "Control" and "X" buttons to copy the cursor where you want to paste and press the "Control" and "V" buttons. Put the á €
